**NO MORE
LINING FAILURE/
CORROSION
PROBLEMS!**

EXTRA HEAVY DUTY!!

Frame mounted, after axle 40* Gallon replacement tank for some FORD cab and chassis trucks and E-Series vans with diesel engines. Tank is constructed of military grade cross-linked polyethylene (XLHDPE). Compatible with most bio-diesel fuel. Solves the problem of lining failure and corrosion in steel OEM tanks. Tank is light in weight, corrosion-proof, extremely durable and features a drain plug for easy maintenance. Complete with rollover vent valve, and vent hose. Fits in the place of the OEM stock tank and uses the existing sending unit. For diesel fuelled vehicles only.

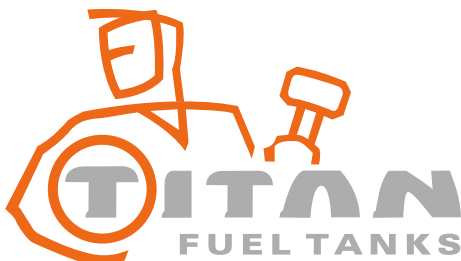

In most cases this product replaces the following original FORD equipment part numbers: XC3Z9002AA, 6C3Z9002BA, 6C3Z9002A, 6C3Z9002E, 6C3Z9002F, 3C3Z9002AA, 5C3Z9002BB

Generally replaces after axle diesel tanks for 1999-2010 Ford F350, F450 and F550 cab and chassis applications that utilize PS-123 sending units. May also be used for some diesel powered E-Series Vans which use PS-191 sending units

*Capacity is approximate.
