

June 23, 2008

Dear Ken,

I wanted to tell you some of the advantages we see with your product.

We have found the tanks fit extremely well. The fit and finish of the hardware and brackets is excellent. The tanks replace the stock fuel tank like a glove.

They are easy to install too. The durable polyethylene construction is almost indestructible, but lightweight and easy for two people to handle. The quality of the tank itself is wonderful and we love the five-year limited warranty.

Titan's customer service is top-notch. Mitch Krebs, our regional manager, is extremely knowledgeable and always more than happy to help.

Thank you for your fine product. It has proven to be a profitable addition to our product line and we highly recommend it.

Yours Truly,

Kurt Lincoln
