

July 30, 2008

Dear Ken,

I just wanted to take a minute to tell you what I like about your Titan fuel tanks.

Foremost, I like the durability and quality of the product. The material you use is exceptionally rugged and strong. Also, the poly-construction prevents any corrosion from damaging the vehicle's fuel system. We live in an area in Canada that sometimes sees temperature extremes and the Titan fuel tank performs well in the hottest summer or coldest winter.

To increase capacity while maintaining excellent vehicle ground clearance is an important feature, when so many of our customers spend a lot of time off-road.

Titan's service has been good. Bret Olsen, Titan's regional manager for our area, does a good job of taking care of us.

Sincerely,

Ryan Clow
