

To Titan Fuel Tanks

I recently purchased my 67gal fuel tank in January 2011 for my 1999 F350 4x4 DRW LB truck. I don't know why I waited so long to do so. Even though Diesel prices are high and going higher each day, it does make sense to fill up and not have to worry about stopping every other day when traveling to and from work as I did with the stock tank. I am on my 3rd tank now (March 29th 2011) since February 23rd 2011 and am glad that I have the tank. Initial fill up of 67 Gals, on first journey traveled 545 miles, Second fill up added 40 gals for the (40 gals used) I still had 27 gallons with 17 usable gals to go an additional 235 miles. Third fill up adding 45 gals after 628 miles in travel, I still had 22 gals with 12 usable gals to go an additional 168 miles. Currently running on my 3rd tank with approximately 265 miles on tank.

I want to express how pleased I am with the installation as it was simple and did not have any problems occur while installing. The design of installation of the Tank and Skid Plate are by far the best design on the market and having the peace of mind for the long haul is definitely a big Bonus. Hat's Off to Titan Tanks and their Team. Very pleasant experience with the purchase, shipping and the customer service. Definitely High Rated 5 Stars in my Book. I share the excitement with everyone I meet on the road and with my friends that have trucks. Hope they are contacting you to get the extended peace of mind also.

Thanks again for a Great Product
