

To Titan Fuel Tanks:

We've been traveling around the country for the last 5 years with a Ford F-350 diesel, pulling a classic car in an enclosed trailer. The biggest problem we've encountered was the time lost with extra fuel stops. Our short bed truck had a limited range of 250 miles due to the stock tank in the truck.

Our solution came from Titan Fuel Tanks. Titan offers a replacement 50 gallon tank for our truck that's an exact replacement fit. We have now increased our miles between refueling to 500. This allows us the ability to refuel in states with a lower fuel tax and stop for fuel when we want, not when we have to.

Recently, we ordered a new 2013 F-350, but before we placed the order I called Titan to make sure that our Titan tank would fit the new truck. I was told by Titan customer service that our current tank would also be an exact fit on the new truck.

Having a Titan fuel tank is as important to me as the type of truck I use.

Thanks,

Rick Frye
