

Hey Guys,

I first contacted you back in Late 2003 when I ordered my GMC Sierra 2500HD. I forgot the fellow's name with whom I worked with back then, but what I do remember is that "Super Tanks" was just starting to get traction. Everyone was working hard to get the word out about their products and their company.

After several conversations with one of your counterparts I was able through forums and friends to order 6 tanks at once (4 for the LLY and 2 for LB7) at a slight discount. Back then the capacity was a bit more, 62-ish gallons but regardless we loved the tanks and everyone was happy!

So here I am ordering my 7th tank! Congrats on your success!

Your products are so cool - they make me want to go out and buy more trucks so I can add one or more of your fuel storage products to them.
LOL...
