

TITAN Fuel Tanks™
INSTALLATION GUIDE

Titan Tech™

1. Turn the truck to run/ accessory mode
2. Plug the Titan Tech™ into the OBD-II port typically located under the driver side of the dashboard.

3. Wait for the green light on the Titan Tech or the horn to beep.
4. Unplug the Titan Tech™.
5. DTE will now recognize the tank size.

Notes:

- If the green light or horn beep does not happen on the first try, repeat the process.
- On some 2025/2026 model years, the DTE may not update immediately. A full tank of gas may need to be run through the system before an accurate DTE shows.
